

Telcordia®
Number Portability Services

001

Access our clearinghouse for rapid number exchange

002

Establish clear regulatory directives

003

Implement all operational capabilities to support portability

► Number portability means freedom for customers and exciting, new competitive opportunities for service providers. However, to be successful, number portability requires careful planning by both regulators and service providers. Regulators must craft rules that firmly establish customer numbers as a public resource and specify the technical and operational capabilities that service providers must adopt. Similarly, service providers must implement the systems and processes that allow them to adhere to number portability mandates and timetables.

Telcordia is uniquely qualified to assist regulators as well as wireline and mobile service providers with all aspects of number portability planning, design, and deployment. We have played key roles in advising policymakers, and in developing and operating the interconnection and number management systems that have set the stage for number portability throughout the U.S. and the rest of the world.

EMBRACE AN INNOVATIVE APPROACH

We have the technical and advisory services to facilitate end-to-end number portability implementations, while minimizing associated costs and risks.

Planning and Advisory Services

Our experts can help regulators formulate the entire governing framework for number portability by assisting with: design of numbering and dialing policies; development of directives and deployment schedules; and definition of number portability requirements, inter-network communications policies, and administration and service order process architectures.

Build Services

We can dramatically reduce the complexity of implementing number portability capabilities by connecting wireline and mobile carriers to the Telcordia® Number Portability Clearinghouse. This clearinghouse solution makes it easy to comply

with number portability mandates by interconnecting carriers and allowing them to exchange numbers almost effortlessly. The Number Portability Clearinghouse controls and tracks inter-carrier messages and serves as a common repository for all ported numbers.

Operational Services

In addition to managing the Number Portability Clearinghouse, we host and manage virtually all of the other support services required for number portability. For example, our professionals maintain data center facilities and help desks, and oversee system administration, security, and disaster recovery.

TRANSFORM YOUR CHALLENGES INTO BUSINESS BENEFITS

Telcordia number portability support can be instrumental in:

- Reducing the time and costs of introducing and maintaining number portability
- Eliminating service disruptions during introduction
- Facilitating on-time compliance with all directives
- Realizing the significant competitive benefits from this capability.

TELCORDIA NUMBER PORTABILITY SOLUTIONS

- Telcordia is the leading global supplier of number portability solutions, with complementary skills in number portability consulting services, software development, and managed solutions. Telcordia number portability offers can help you reduce the time and costs of introducing and managing number portability, facilitate on-time compliance with numbering mandates and directives, and realize significant competitive benefits.
