

## 2012 GR Projects

### *High-Level Forecast of Proposed Telcordia GR Work Projects in 2012 in Numerical Order*

These GR tables contain the latest high-level forecast of potential Telcordia GR work, including the project scope, precise timeline, and detailed technical description of the potential work. The Estimated Project period is a target timeframe. The exact start date is contingent upon contracted participation and participants' schedules. **You may view any proposed project scope by clicking on the associated Project Description link.**

Telcordia reserves the right to withdraw from any GR work listed if Telcordia deems that there is insufficient interest or inadequate participation.

The scope of a GR project is determined by the number of expected funding participants. While a project may proceed with fewer participants, the scope of the work may need to be scaled back accordingly. The participating industry members for each project will be apprised regularly of project status and change in scope.
